Summary

Seeking an entry-level junior data analyst or IT analyst position to gain hands-on experience in data entry, data cleaning, and analysis. Highly motivated and detail-oriented, with a strong foundation in mathematics, statistics, and data management. I am eager to apply my skills to ensure data accuracy, organization, and quality in a professional setting. I have extensive experience working in fast-paced, team-oriented environments, adapting to evolving tasks, and maintaining a strong focus on precision and efficiency in data-related tasks.

Education

University of Manitoba.
Year: Fourth year
Major: Computer Science
Minor: Management

Skills

- Java
- C/C++
- Assembly Language
- Ruby
- Android Studio
- Python
- API documentation and technical writing
- SQL
- Github
- Git
- JavaScript
- Word
- Excel
- LC3
- React

Projects

- Created a Mood tracking app with Android Studio with implementation of a database. Worked on backend logic layer as well as creating DSOs and testing (Unit tests, Integration tests and Acceptance tests in Java).

- Link to app- https://github.com/alveejawad/WellSync

- Our study group designed a database for Top 100 music that can be accessed using queries from a host programming language (we used Python). We used indexes to reduce run time and calculated I/O costs for queries.

- Created a chat room using a thin client and a server that uses TCP to send and receive messages (coded in Python)

- Created a website using React.

- Made a simple OAS document using Swagger editor.

- Formatted my resume using markdown language and then hosted it online using GitHub

Work Experience

Workplace: University of Manitoba College of Nursing
